

AUTOSTORETM EXPRESS

Control Business Documents with a Push of a Button

AutoStore Express is an entry-level scanning solution that lets you capture, process and route documents from a central location in your company. With one-touch from a multifunction peripheral (MFP) you can scan, index and send all of your important documents to virtually any destination, including desktop PCs, database, email, network folder, fax server - and more; all the while maintaining security with user-based authentication at each device.

A Smart Investment

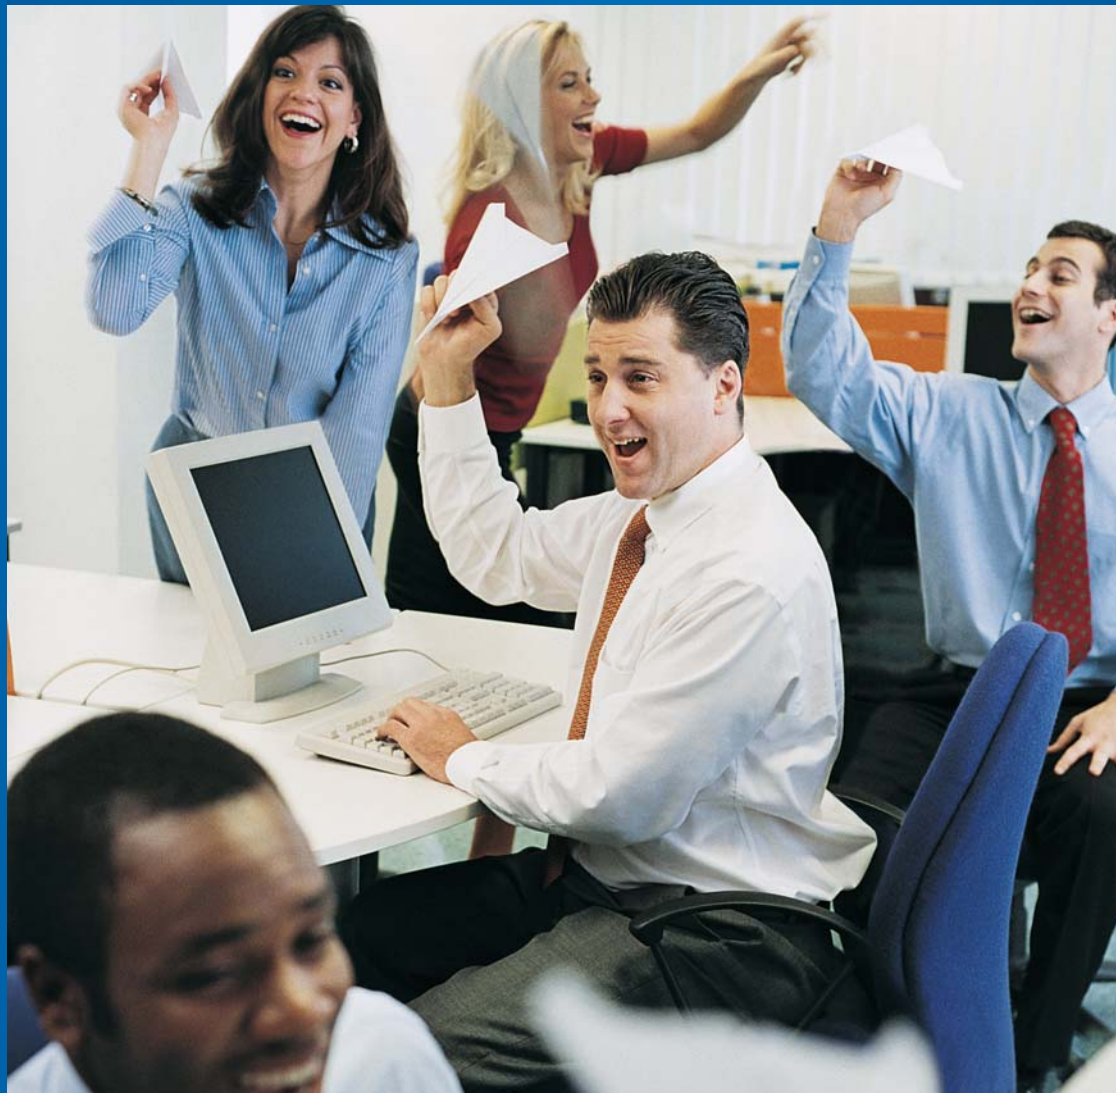

At a fraction of the cost of other business automation software, AutoStore Express, with its device-only licensing structure, includes a host of features, from image clean-up and barcode processing to searchable PDF conversion. There are no page counts or click-charges either.

AutoStore Express also works with most brands of MFPs and scanners so there's no need to purchase additional equipment. And, best of all, AutoStore Express is easy to setup. Your IT administrator can do it in just two hours or less.

Key Benefits

- Flexible application fits individual business needs
- Centrally managed workflows increase efficiency and control
- Documents sent to and from multiple locations save paper and courier costs
- Device "agnostic" leverages existing scanners and MFPs

EVOLVE.

A Simple Scanning Solution for Business Automation

Express Yourself

With a few clicks, AutoStore Express will process the document according to the customized workflow that is selected from the front panel of the MFP.

1. Login.
2. Place documents in the document feeder of the device.
3. Select a customized AutoStore Express workflow button.
4. Enter the document's required indexing information at the device panel.
5. Press Scan.

For example, the electronic version of the document might be saved into a network folder as well as to SharePoint, and then also sent on as an email attachment to one of your co-workers. It's easy and versatile.

Scalable Workflow Solution

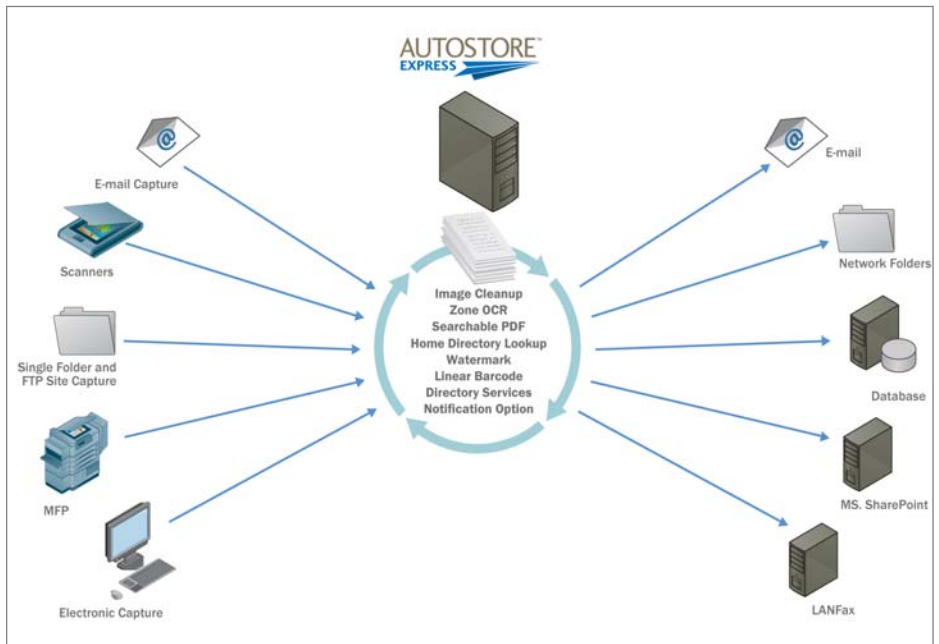

Whether you have a small or medium sized company or a Fortune 500 – AutoStore Express will grow right along with your business. Need to capture paper and electronic files, do Bates stamping, or increase your document processing options? Upgrade to AutoStore Workflow. Want to add document routing coversheets so you can batch scan documents? Then, add SMARTickets. AutoStore Express has an upgrade path already in place.
